Commerce Kickstart:
Drupal Commerce in a snap.

Flexible, fast, feature-filled

Whether you're building an eCommerce site for yourself or a client, you have a choice: You could start with one-size-fits-all software that's not quite right, or try a "framework" that takes hundreds of hours to develop. Either way, it's going to cost you.

Commerce Kickstart is the better way. It starts with Drupal, the enterprise-strength framework that runs some of the world's largest and busiest sites. Then it adds Drupal Commerce, configured for easy installation and customization, and connected to a living marketplace of services and products to keep your site as compelling tomorrow as it is today.

Then Commerce Kickstart gets out of your way so you can get down to business.

Launch-ready

Commerce Kickstart is as easy to install as Drupal itself: A junior administrator can get you selling within hours. It runs beautifully on Commerce Platform, or on practically any other host you choose.

Commerce Kickstart has features you'd have to build from scratch with other software, including a mobile-ready design; faceted search; image zooming & slideshows; and international shipping, tax, & payment frameworks. It comes ready to go, but open to change.

Endlessly adaptable

Commerce Kickstart is especially good at selling physical products, but makes no assumptions about what you sell — or how.

Easily change your store's functionality and appearance. Reshape it to sell digital products, tickets, subscriptions, or online access; allow site visitors to rate and review products; integrate smoothly with your existing business systems.

Or go even further with Commerce Marketplace, a bazaar of proven enhancements made easy to adopt and administer through Commerce Kickstart's interface. Accept multiple forms of payment; translate content; analyze sales trends; provide live customer chat; and much more. It's all in a day's work for Commerce Kickstart.

Did we mention it's free?

Commerce Kickstart is free and open-source software, leaving you more resources to attract, convert, serve, and keep customers.

Need guidance? As the creator of Commerce Kickstart and a leader of Drupal Commerce's development, Commerce Guys provides consulting, training, development, referrals, and support services to ensure your eCommerce site is all it can be.
